This is a Hot Water coil designed to provide increased capacity when the required load exceeds that of the standard coil for a given size. Fins are double depth and there are two rows of tubes.

The durable mechanically bonded copper/aluminum coil presents the best of today's hydronic technology. Providing 12 fins per inch with 1/2" nominal diameter tubes, the ultimate in BTU capacity is provided without sacrificing noise, vibration or amp draw.

All units are designed so that field modifications can be made to reverse the coil position if required.
