

UNITAIRE

High Security Options Package

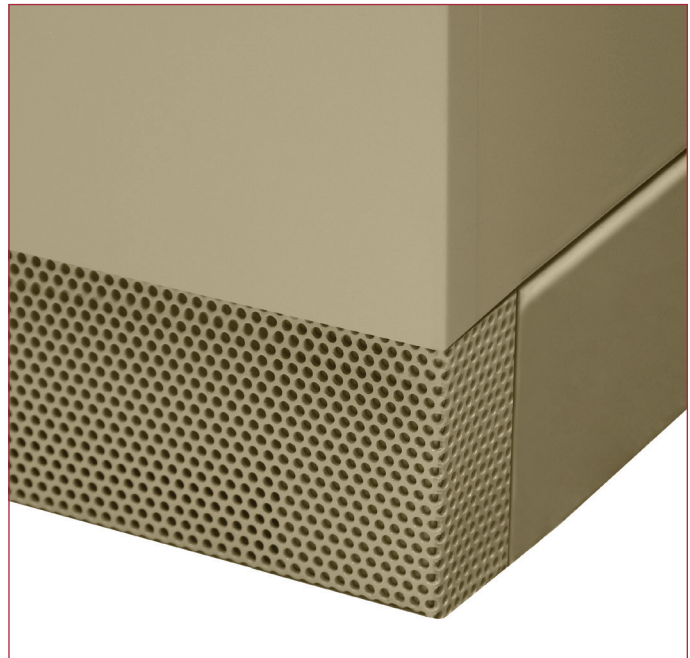

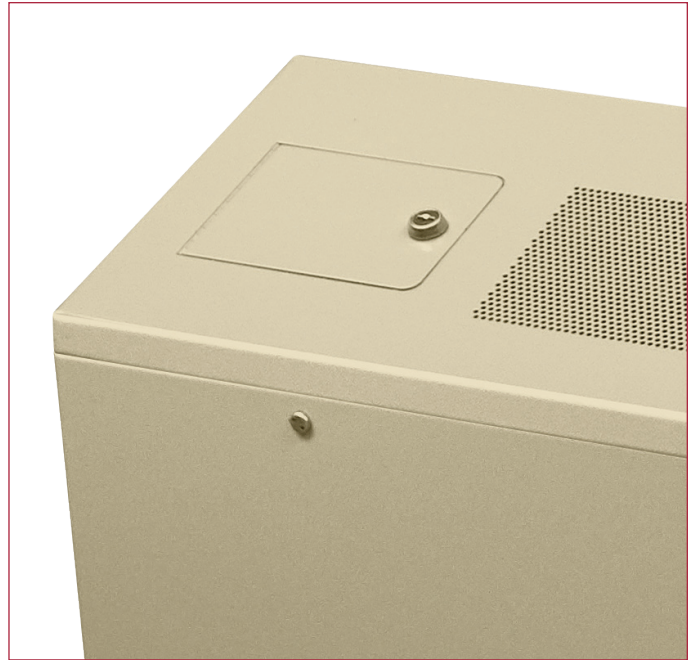

UNITAIRE High Security Options Package

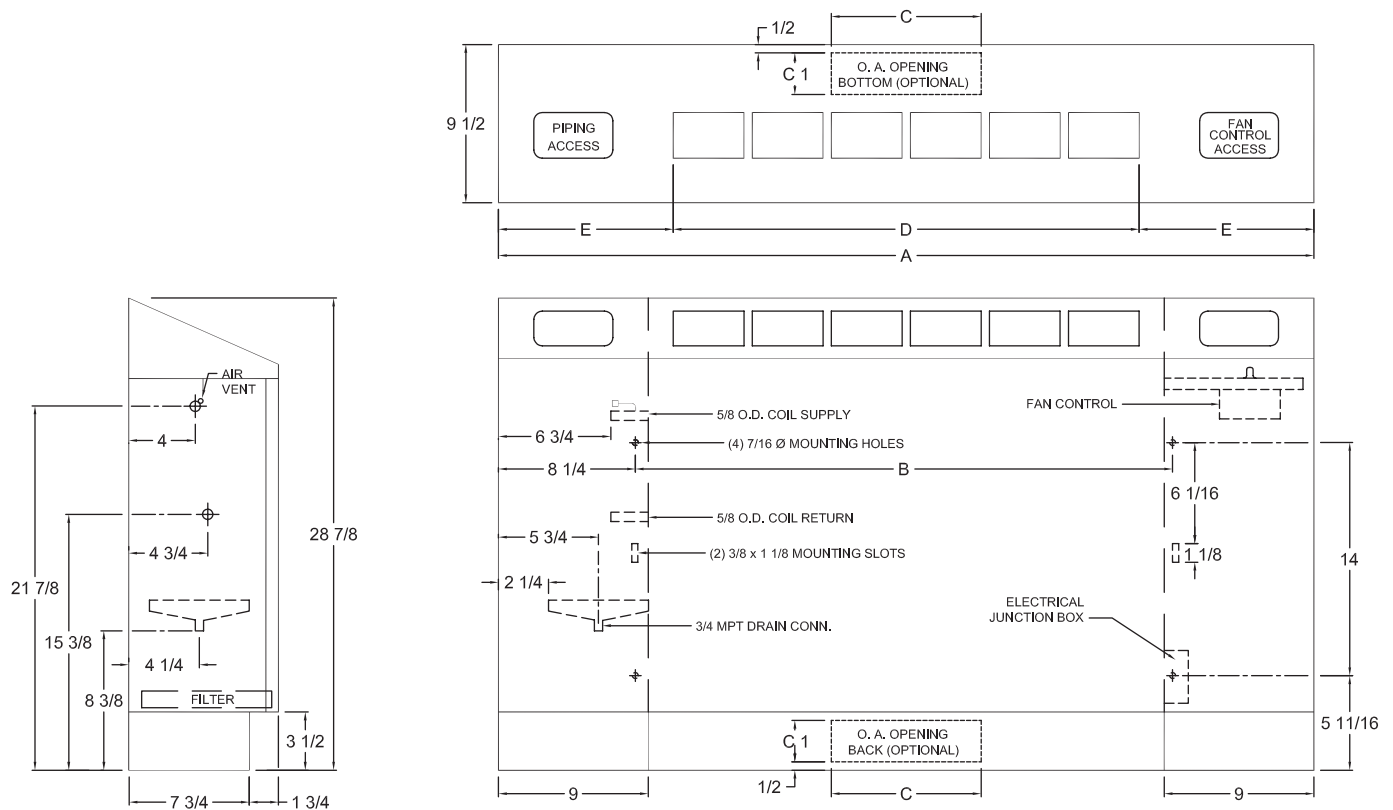

The Model SETF slope top or FETF flat top fan coil unit is available with a high security options package designed for the correctional and behavioral health industries. Airtherm's ultra-quiet fan coils offer an astatically pleasing energy efficient easy to install and maintain solution for space heating and cooling. Fan coils can be individually controlled to maintain space temperature in a particular room with either unit mounted, or remote mounted controls. The units are designed to reduce risk of self-injury in psychiatric wards, mental health facilities and detention centers. The option package is specifically focused on reducing the ability to injure through ligature strangulation and contraband concealment.

Standard Features

- **Sturdy 14-gauge steel cabinet with 3/16" perforated air inlet and outlet surfaces**
- **Sloped top panel with welded construction**
- **Custom cabinet sizes**
- **Key lock flush access doors for unit mounted controls optional**
- **8 point 7/16 bolt mounting**
- **ECM motors for quiet operation to meet designed airflow**

Dimensional Drawings

Left hand piping connections shown, right hand opposite. Piping hand determined when facing air outlet. Electric junction box location may vary depending on control requirements. Contact Factory.
