Standard Materials and Construction

- FRAME:** 5½" x 7⁄8" x 16 GA. galvanized steel hat channel. Flat 16 GA. galvanized steel head and sill for maximum free area on dampers less than or equal to 13" high.
- BLADES:** 16 GA. galvanized steel single thickness, parallel action.
- AXLES:** Plated solid steel stub.
- BEARINGS:** Oil impregnated bronze.
- LINKAGE:** Plated steel angle and crank plates with stainless steel pivots, in-jamb type or on-blade type.
- STOPS:** 18 GA. galvanized steel angles at head and sill.
- BLADE SEALS:** Silicone.
- JAMB SEALS:** Stainless steel.
- SLEEVE:** 20 GA. galvanized steel by 15" long (1½" grille clearance) or 17" long (3½" grille clearance) with 13⁄16" front flange.
- INSULATION:** Factory installed 0.2" thick intumescent insulation on top and both sides (vertical mount) or all four sides (horizontal mount).
- CAULKING:** Hardcast ironrip 601 or UL-listed equivalent.
- ACTUATOR:** Electric with heat response device (EHRD) or pneumatic with heat response device (PHRD). Factory-installed for Power-Open/Spring-Close (fail close) operation. Internally mounted and accessible from grille side, or mounted externally or internally for continuous duct applications.
- FINISH:** Mill.

Options

- Integral Dual Position Indication (IDPI) Switches
- Sensotherm Re-Openable Heat Response Device (ESOT) for electric actuators
- Sensotherm Re-Openable Heat Response Device (EPOT) for pneumatic actuators
- Model SM-501 flow-rated smoke detector
- Shipped loose
- Model 2D51 no-flow smoke detector (12" minimum damper height)
- Copper tubing (for pneumatic actuators)
- Tab-lock retaining angles - 1 or 2 Sets
- Stainless steel bearings
- Sleeves of various depths and gauge thickness (restriction apply)
- Round or oval transitions
- Short-width (less than 10") and/or short-height (less than 10") transitions

Notes

- Damper frames are provided approximately ¼" undersized. The addition of a sleeve and insulation will increase the size of the assembly. See SI-FAGM or SI-FACD for sizing openings.
- Dampers smaller than minimum frame size require a transition. Refer to SD-TRFS. When transitioned on one-side only (which will be a damper supplied with a transition on the non-jackshafted side only), the grille size should be selected to match the damper frame size, not the transition collar size.
- Damper with smoke detector must have a minimum sleeve of 16" (1½" setback) or 18" (3" setback).
- Dampers for horizontal installation can only be mounted in a fire barrier constructed of masonry/concrete materials.

Operational Ratings

Maximum Differential Pressure: 4 in. w.g.
Maximum Face Velocity: 2000 fpm

Leakage Ratings

UL Leakage Class II
20 cfm per sq. ft. maximum @ 4 in. w.g.

Pressure Drop

The pressure drop data shown below is based on laboratory conditions. The test setup does not take into account elbows or other duct fittings that are part of every actual duct system. The configuration of the actual duct system immediately upstream and downstream of the damper often contributes more pressure loss than the damper itself.

This product was tested
in accordance with AMCA
Standard 511.
