

QUICK SWIVEL Mounting Bracket

FEATURES

- Time Saving Installation
- Powder Coated for Long Life
- Safe and Secure Foundation
- Complete Hardware Package Provided
- Allows for Installation in Any Direction
- For Residential and Light Commercial Units

Quick Swivel provides a quick, safe, and affordable platform for mounting the unit in any direction, without the need for a custom mounting bracket.

The Quick Swivel can easily be installed in residential or commercial applications. Turn the Swivel in any direction and lock it in place*, it's that quick.

The flush mount hanger arm is slotted to receive a 5/16" lag bolt 16" or 24" on center. It can be attached parallel or perpendicular to the joist.

Our Quick Swivel is made with 14-gauge steel able to hold 200 lbs. The swivel allows for a 360° rotation for setting the perfect direction of air flow.

The square steel tubing cuts down on vibration while 3 hitch-pins add to the safety and sturdiness of the Quick Swivel with "H" bracket.

Installation accomplished in minutes with all necessary hardware provided.

*** Once Quick Swivel bracket is locked into place, the unit can be connected to gas supply. Do not attempt to rotate unit while connected to gas supply piping.**
