

LEAD TIMES – Nov. 2021 (REVISED)

COVID-19 may temporarily extend lead times due to the supply chain interruptions.

Lead times are defined as the workdays required for order entry, credit review and actual manufacturing of the product. Delays in order processing due to credit approval, submittal approval or clarification of missing or incomplete data will increase the standard lead times. These lead times refer to standard configured products only, please contact CSR for specialized units.

The lead times and rush fees apply to 1 or 2 units. Please contact CSR if multiple units are required.

NOTE: pumps and 3-way valves are not included on the 72 HR rush schedules, please contact CSR for availability.

<u>PRODUCT</u>	<u>LEAD TIME</u>	<u>72 HR RUSH FEE (NET PER UNIT)</u>
