# Extruded Aluminum Damper • 5" Deep • 6" Airfoil Blades • Jamb Linkage • Parallel

## Standard Construction and Materials

FRAME: 12-GA (.081" nominal) extruded aluminum. Hat channel, on

four (4) sides, with reinforcing bosses and groove inserts for

silicone seals. 5" deep.

**BLADE:** 12-GA (.081" nominal) extruded aluminum. Single unit airfoil design, with the pin-lock an integral section within

the blade core. 6" wide (4" and 5" wide available).

SHAFTS: 1/2" dia. extruded aluminum, pin-lock design interlocking into

blade section.

BEARINGS: "Double-Sealed" type with celcon inner bearing on axle

riding in polycarbonate outer bearing inserted in frame so that outer bearing cannot rotate. Axle bearings to be designed for no metal-to-metal or metal-to-bearing riding surfaces. Interconnecting linkage to have celcon bearings

to eliminate friction in linkage.

SEALS: Extruded silicone rubber seal. Stainless steel spring jamb

seals. Fit into dovetail-shaped slots on both frames and

blades.

**LINKAGE:** In jamb. Aluminum crank-arm permanently locked to blade shaft by two stainless steel fasteners. Crank-arm

contains a 1/2 dia., machined steel trunnion riding in a celcon bearing. A plated steel 1/4 - 20 set screw with locking patch ties the pivot to the 1/4 dia. aluminum linkage rod.

Linkage of each damper is individually adjusted.

FINISH: Mill.

Options

Hand Quadrants 120V, 24V Electric, or Pneumatic Actuators

Jackshafting

Auxiliary Switch

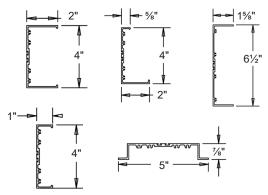

Explosion Proof Housing

#### Notes

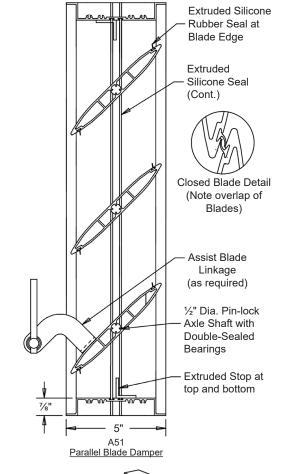

- 1. ½" nominal deduction will be made to the opening size given.
- Please specify whether opposed or parallel blade orientation is required.
- 3. Approximate shipping weight is 5.5 lbs./sq.ft.

### Damper Sizes

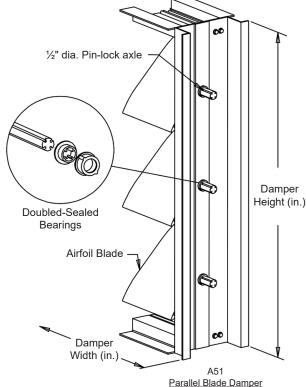

Model	Min Panel	Max Single Panel
Parallel	6"W x 61/4"H	60"W x 96"H
Opposed	6"W x 61/4"H	60"W x 96"H

Optional Frames Available
