MCDLG
Mestek Commercial Damper & Louver Group

The Mestek Commercial Damper and Louver Group (MCDLG) is a group of top-tier HVAC brands including Arrow United Industries, Air Balance, Cesco Products, and Louvers & Dampers.

Together, we provide industry-leading air control and ventilation products for the HVAC and construction industries. Our team will ensure that you get the best solutions for your requirements.

MCDLG has the skills and experience to meet the high standards of today's market. Our products are made in the United States, to guarantee the highest quality of manufacturing.

Each MCDLG brand is an active member of the Air Movement and Control Association (AMCA). All AMCA-rated louvers are tested in accordance with the latest AMCA standards.

We also offer our UL Life Safety products, each tested to meet UL Standards for Dampers. Look for our MCDLG brands and find a dependable HVAC solution when you need it most.

Trust a group with over 50 years in the HVAC industry. Trust the Mestek Commercial Damper and Louver Group.

OUR PAINT SYSTEMS

The Mestek Commercial Damper and Louver Group offers a selection of thirty (30) solid stock colors and five (5) metallic stock finishes as seen on this color chart. We also offer color matching (minimum paint purchase required). Please contact our customer service team for more information.

For warranty information, please refer to the Paint Systems chart on the back of the brochure.

All of MCDLG's powder paints support the Green Building Initiative & LEED.

MCDLG 2604-02

MCDLG 2604-02 is our Standard Powder Coating designed for multi-purpose applications. This paint system meets the criteria of the AAMA 2604-02 specification. The MCDLG 2604-02 paint system has been successfully tested in South Florida outdoor conditions, achieving 3000 hours of sun exposure without failing. It is also rated for 3000 hours of salt spray performance, for projects in coastal and beach settings.

MCDLG 2605-02

MCDLG 2605-02 is our High Performance Fluoropolymer Thermosetting Resin powder paint system with a significantly higher surface hardness, mar resistance, and abrasion resistance. The MCDLG 2605-02 is a dependable, specialized paint system that meets the stringent standards of AAMA 2605-02.

KYNAR 500®

Kynar 500® resin is a special grade PVDF resin used by MCDLG as a base resin in life-long coatings for aluminum and galvanized steel products. This coating is resistant to chalking and UV deterioration. Kynar 500® exceeds all the test requirements of the AAMA specification 2605-02 for high performance organic coatings on architectural aluminum extrusions and panels.

KYNAR XL

The Kynar XL uses our Kynar 500® paint system as a base line and then adds an extra clear coat. This superior coating is extremely resistant to chalking and UV deterioration. This coating exceeds all the test requirements of the AAMA specification 2605-02 for high performance organic coatings on architectural aluminum extrusions and panels.

ANODIZING

This electrochemical process is designed to age the aluminum in a controlled environment, which can seal the surface of the aluminum and provide protection from the natural aging process. MCDLG provides anodizing as a clear process, or infused with special dyes including black and shades of bronze. These colors may vary based on the aluminum alloy used.

Disclaimer: Colors displayed on your screen may differ from the finished product. For the most accurate results, visit [the MCDLG Contact Page](#) to request a color chart from Customer Service. Specify MCDLG when making your request.
