

Pressure Drop Data

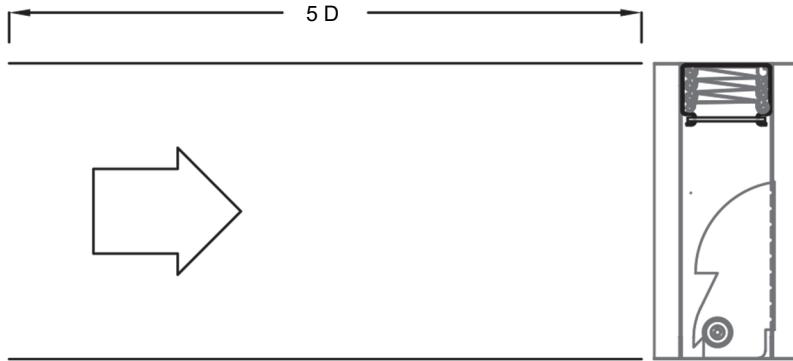

For Curtain Fire Dampers: 119, 117, 15S, 17S, D19, D17, 15D, 17D, 319, 317, 30S, 38S, D39, D37, 30D, 38D

The following air performance data is collected from testing conducted in accordance with AMCA Standard 500-D for Figures 5.2, 5.3, and 5.5. All data has been corrected to represent standard air density at 0.075 lbs/ft³ (1.201 kg/m³).

AMCA 500-D, Figure 5.2

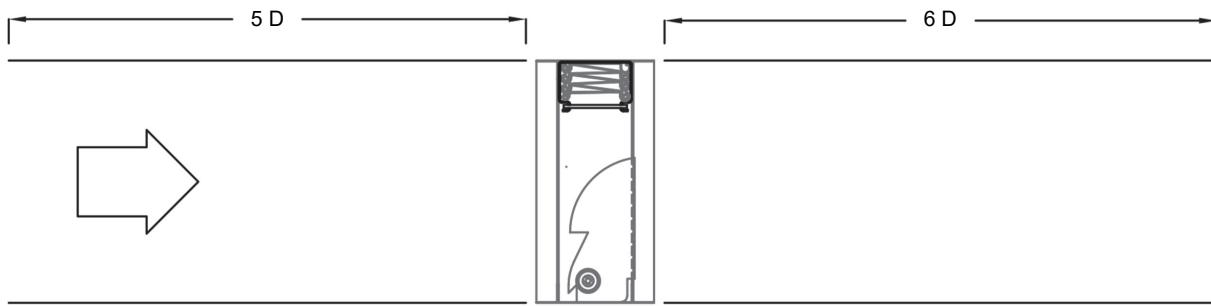

Ducted damper exhausting air to atmosphere.

$$\text{Where } D = \sqrt{\frac{4(\text{Width})(\text{Height})}{3.14}}$$

AMCA 500-D, Figure 5.3

Fully ducted damper (upstream & downstream).

AMCA 500-D, Figure 5.5

Plenum mounted damper.
