## SPECTRUM SERIES

# DOMESTIC HOT WATER HEATERS AND BOILERS

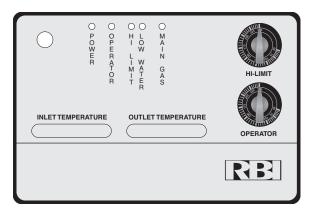

### Residential and Light Commercial Gas Boilers and Water Heaters in a Compact Design

The Spectrum's unique design allows for both indoor or outdoor applications where a non-condensing gas-fired boiler or water heater is needed. Its reversible, two or four pass heat exchanger is made of commercial grade 7/8" I.D. finned copper tube and because the fins are extruded from the tubing itself they ensure maximum heat transfer efficiency.

Spectrum Series units are available with either glass lined or bronze headers for heating applications or domestic hot water and pool heating (Canada Only) applications. Also, all units have built-in draft diverters which reduce the cost of installation and lower the overall height of the unit.

The Spectrum Series is simple to maintain with the quick and easy removal of all major components including burner tray, gas train and controls. With the self-diagnostic light package, one can quickly and easily make assessments of the unit.

Self-Diagnostic Light Package

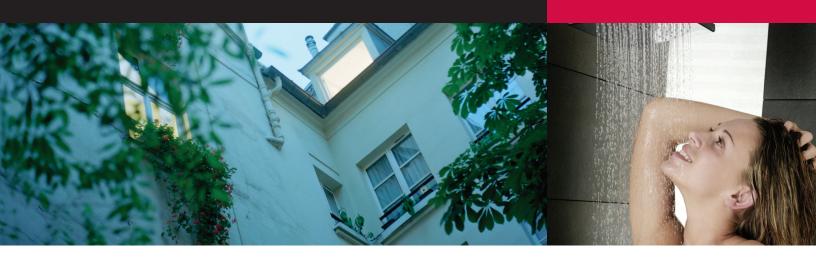

All Spectrum units come standard with Galvalume jacketry. Galvalume is a coating consisting of zinc, aluminum and silicon used to protect metal from oxidation. Galvalume is applied to a material (steel) using a continuous hot-dipping process, which creates up to 1ML protective barrier against rust and oxidation.

#### **Features and Benefits**

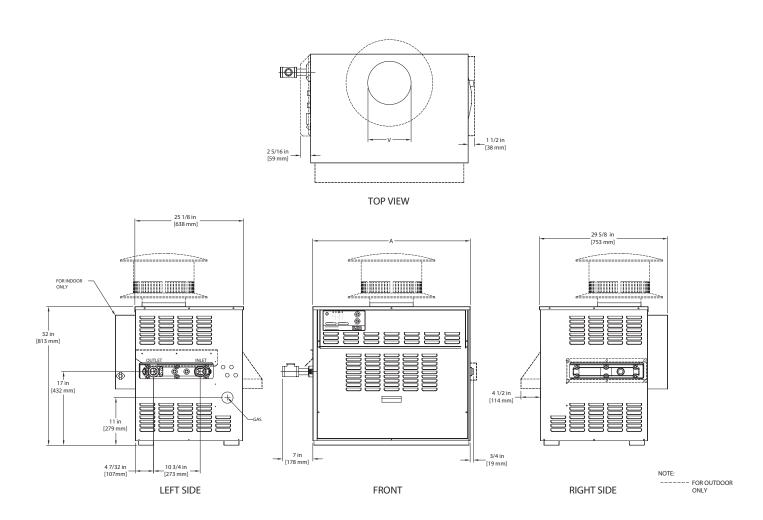

- Automatic Reset High Limit 100-200
- Manual Reset High Limit 250-400
- Operating Control
- Mounted ASME Relief Valve (30# Boilers, 125# Water Heaters)
- Built-In Draft Diverter
- Stainless Steel Burners
- Glass Lined Headers
- Inlet & Outlet Thermometers
- Mounted And Wired Flow Switch
- Vent Damper (100-250 MBH Boilers Only)
- Self Diagnostic Light Package
- Pump Control
- 160 psi Heat Exchanger
- Field Reversible Heat Exchanger
- Electronic Ignition

#### **Optional Equipment**

- Bronze Headers
- Outdoor Installation
- Four-Pass Heat Exchanger
- Cupro-Nickel Heat Exchanger
- Low Water Cut-Off (Probe Type)

- Induced Draft (up to 100 ft. Horizontal Runs)
- Propane Gas
- 2-Stage Firing
- Combustible Floor Pan

<sup>\*\*\*</sup> For water heater efficiency information please visit www.ahridirectory.org.

#### Note

For normal water conditions and in closed loop systems, a temperature rise of 20°F is generally recommended. In open systems for areas experiencing some degree of heat exchanger scaling as a result of water hardness, a rise of 10°F should not be exceeded.
